DERMAFERT NPK 6-7-13 BIO

Characteristics

DERMAFERT NPK 6-7-13 BIO is an organo-mineral NPK fertiliser with a low content of chlorine, obtained through a reaction between mineral matrices and organic protein components. The product contains: organic nitrogen from scleroproteic origin with natural slow release, capable of ensuring a constant supply during the entire cropping cycle; assimilable phosphorous protected by organic matter in order to avoid insolubilisation processes; potassium from sulphate with high solubility; a high content of sulphates immediately available and a huge amount of organic matter from protein origin (>38%). The high agronomic efficiency of **DERMAFERT NPK 6-7-13 BIO** permit to optimise the supply of fertiliser unit, reducing the fertilisation costs and the environmental impact. The product is recommended for all the crops requiring a constant nitrogen supply, and is particularly suitable for potassium demanding crops and potassium deficient soils. It can be used for the autumn and spring basal fertilisation, as well as for top dressing applications in fruit trees and vineyards, especially with grasses conditions. The presence of potassium from sulphate and sulphates makes **DERMAFERT NPK 6-7-13 BIO** particularly suitable for the high quality crops, especially for those sensitive to chloride.

Composition

	w/w
Total nitrogen (N)	6.0%
Organic nitrogen (N)	6.0%
Phosphoric anhydride (P ₂ O ₅)	7.0%
Water-soluble sulphur trioxide (SO ₃)	11.0%

	w/w
Water-soluble potassium oxide (K ₂ O)	13.0%
Total calcium oxide (CaO)	9.0%
Organic matter	40.0%
Organic carbon (C)	20.0%

Components

ORGANIC FERTILISERS:
Hydrolysed leather and hides
Meat meal
Bone meal

MINERAL FERTILISERS:
Soft natural phosphorus
Potassium sulphate
<i>It can also be used in fertilisation plans that benefit from the incentives provided by local regulations and regional, national and European laws.</i>

Doses and Instructions

CROPS
Fruit trees
Horticultural crops
Ornamental crops
Industrial crops
Fresh-cut produce crops

APPLICATION RATES Kg/ha
500-600 during planting, pre-vegetative growth phase, and post-harvest
700-900 pre-sowing or transplanting
600-700 pre-sowing or transplanting
800-900 pre-sowing or transplanting
600-700 pre-sowing

* Suggested application rates are indicative and may vary depending on local conditions and crop needs.

Formulation

Micropellet

Packaging

25 -500 kg

Diameter

3-4 mm

Humidity

< 10%

Warnings

The product should be incorporated into the soil, ensuring it does not come into direct contact with the plant. Store in a weather-protected area.
