

NemaOil

PHYTOFORTIFIER

A healthy root requires the best ally

Strengthens the root by stimulating the thickening of its cortical tissue

Promotes the recovery of root growth following stress condition

Stimulates the plant's natural defence

NemaOil

Characteristics

NemaOil is a product based on oils and plant extracts that actively promotes the recovery of plants subjected to root system stress. Indeed, it is able to promote significant rooting and consequently the plant is able to heal tissues damaged, for example, by nematodes. This result is possible thanks to the synergic action of oils and extracts of plant origin that support the plant's natural physiology over time. Moreover, thanks to its special composition and the way its natural components are extracted using exclusive **PLANTEX SC®** technology, the product activates the plant's natural defence system against pathogens in the root system.

Composition

Vegetable oils (treated in alkaline solution) 60%

Doses and Instructions

CROPS	FERTIGATION APPLICATION	DOSE l/ha*
Horticultural crops	From the early stage of growth - Repeat treatment every 10 - 14 day	15 - 25
Fruit trees	From the early stage of growth - Repeat treatment every 10 - 14 day	15 - 25
Ornamentals	From the early stage of growth - Repeat treatment every 10 - 14 day	15 - 25
Industrial crops	From the early stage of growth - Repeat treatment every 10 - 14 day	15 - 25
Table and Wine grapes	From the early stage of growth - Repeat treatment every 10 - 14 day	15 - 25

* The doses are indicative and should be adjusted based on the characteristics of the area and the specific needs of each crop.

Formulation	Packaging	Density (T=20°C)	pH (sol. 6 %)	Conductivity (sol. 10 %)
Soluble liquid	1-5-10-20 l	~ 990 kg/m ³	~ 10.5	~ 36.0 dS/m

Warnings

When used in combination with other products, it is recommended to test the miscibility and compatibility on a limited number of plants. Avoid mixing with products that have a strongly acidic or alkaline reaction, or with those containing sulfur. Before use, shake the container vigorously. When applied with a weed control rod, it is necessary to follow the treatment with abundant irrigation using only water. The product is completely natural and cannot be classified as fertilizer or plant protection product.
